

# MONIKER

## CABERNET SAUVIGNON

Moniker Cabernet Sauvignon is a structured wine showcasing two select vineyards both of which feature the Pinole soil. These gravel loam rich soils force the typically vigorous Cabernet vines to form small berries which in turn create dark and densely flavored wines. From maceration to fermentation, we worked to preserve the wine's tannic backbone: cold soaking the grapes for two days, pumping over the cap, and briefly leaving some of the lots on the skins for greater extraction. We chose a Languedoc yeast strain prized for delivering optimum fore-mouth volume while retaining varietally correct flavors of currant, black olive and tobacco. We then blended in a touch of Petit Verdot for power. American oak's bold vanilla and spice character add to the savory and fruit forward nature of this age-worthy wine.
